IGLUPARK

Iglupark is an aparthotel in Lennusadam Seaplane Harbour, Tallinn, run by Iglucraft, a well-known producer of saunas and cabins. Iglupark offers a unique experience to spend some quality time in the most vibrant area of Tallinn.

My task was to design a website that goes in line with the main Iglucraft website but still maintaining visual distinction of its own.

Playful and earthy, Iglupark website conveys the idea of both closeness to nature and vibrant city life.

Year	2022
Production	DUX
Type of work	UI, UX
