Meet EWAC

EWAC was born from the dream of one man to become a global engineering powerhouse.

Founded in 1989, EWAC remains a family-owned company, with this dream now being carried forward by a second generation. This continuity means that our knowledge and experience have grown steadily, passed down from father to son. In our work and ventures, we are explorers, always seeking new opportunities to enhance our products, our production processes, and our team.

WHO WE ARE

As explorers we are in constant movement.

For EWAC, becoming a global leader is a journey, not a destination. The company recognizes that excellence is a moving target, especially in the fast-paced world of engineering. What is considered innovative and cutting-edge today might become obsolete tomorrow. Therefore, EWAC is committed to perpetual growth and improvement. The company doesn't just aim to meet global standards; it strives to set them, constantly pushing the boundaries of what is possible. Our movement is based on two key factors - innovation and quality.

Quality

Quality for us isn't just about superior materials or meeting ISO standards. It encompasses everything from a deep understanding of the client's needs and extends through every stage of the product lifecycle. Quality is embedded in meticulous planning, innovative engineering solutions, thoughtful design, efficient production, and precise installation. This comprehensive approach ensures that EWAC doesn't just deliver products; it provides solutions that genuinely enhance the client's operations and end-user experiences.

Innovation

Innovation doesn't just appear out of thin air. It is a comprehensive amalgamation of knowledge and experience, accrued over time and recombined in new ways. This is our approach to work and thought. Our experience ranges from engineering and producing critical components for nuclear power plants to creating the most innovative hydrotherapy solutions. Each field we delve into provides us with new knowledge and experiences, which we carry forward into our next projects, from agricultural machinery to yacht building.

INNER CULTURE

We are guided by values, that are reflected in everything we do.

01

Constant Quest for Newness and Innovation

We are driven by a desire to discover new horizons and possibilities. We are not content with the status quo and are always looking for innovative ways to improve products, services, or processes. This constant quest for innovation should be ingrained in our culture, encouraging creativity and out-of-the-box thinking.

02

Emphasis on Freedom and Flexibility

We value freedom and flexibility, both in terms of business operations and in the work environment. We encourage autonomy among our people, allowing to explore ideas and take ownership of projects.

This freedom often leads to greater creativity and a sense of empowerment among the people.

03

Adventurous and Risk-Taking Spirit

In our venture we are more willing to take calculated risks. This adventurous spirit can lead us to groundbreaking innovations and pioneering new markets.

However, it also requires a resilient culture that can adapt to and learn from failures or setbacks.

04

Connection with the External World

We are outward-looking, constantly seeking inspiration from the world around us. We must be highly aware of global trends, customer needs, and changes in the marketplace.

This outward focus helps us stay relevant and responsive to the evolving demands of our industry.

05

Value Authentic Experiences

There is a strong emphasis on authenticity within our company. We strive to create products or services that are not only innovative but also genuinely enrich our customers' lives. This focus on authentic experiences often leads to a strong brand loyalty among customers who share similar values.

06

Encouragement of Learning and Development

Continuous learning and personal development are key aspects of our culture. We encourage our people to expand their skills, knowledge, and perspectives.

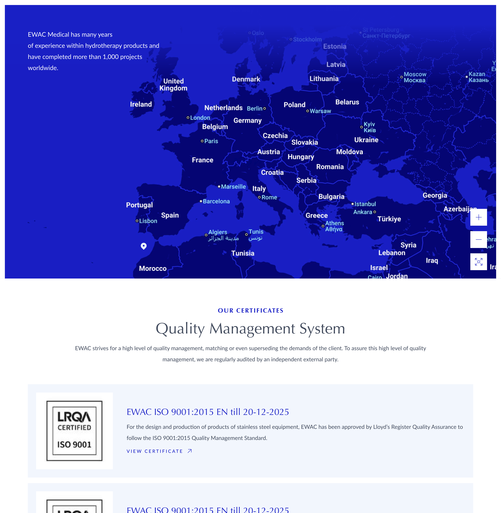

This commitment to growth helps us to stay dynamic and adaptable.

07

Embrace of Change and Diversity

We thrive on change and diversity. We see these elements as opportunities for growth and innovation, rather than threats. This openness to different ideas, cultures, and approaches fuels our inventive spirit and helps us to adapt quickly to new challenges.

EWAC Medical has many years of experience within hydrotherapy products and have completed more than 1,000 projects worldwide.

OUR CERTIFICATES

Quality Management System

EWAC strives for a high level of quality management, matching or even superseding the demands of the client. To assure this high level of quality management, we are regularly audited by an independent external party.

LRQA CERTIFIED ISO 9001

EWAC ISO 9001:2015 EN till 20-12-2025

For the design and production of products of stainless steel equipment. EWAC has been approved by Lloyd's Register Quality Assurance to follow the ISO 9001:2015 Quality Management Standard.

VIEW CERTIFICATE

LRQA CERTIFIED ISO 13485

EWAC ISO 9001:2015 EN till 20-12-2025

For the design, production, sales and maintenance of Class I Medical Equipment, EWAC has been approved by Lloyd's Register Quality Assurance (LRQA) to follow the ISO 13485:2016 Quality Management Standard.
